PUMPS & IRRIGATORS

POND PONTOON

**DESIGNED FOR REEVE VERTICAL CANTILEVER PUMPS
FLEXIBLE: PUMPS, STIRRERS, PLATFORMS, WALKWAYS
ONE PIECE MOULDING**

MULTI-PURPOSE HEAVY DUTY MOULDED POLYETHYLENE PONTOON

- IDEAL FOR FLOATING PUMPS ON EFFLUENT PONDS
- DESIGNED TO SUPPORT UP TO 350 KG GROSS WEIGHT
- AVAILABLE BARE OR COMPLETE WITH GALVANISED PUMP MOUNTING FRAME WITH TETHER POINTS

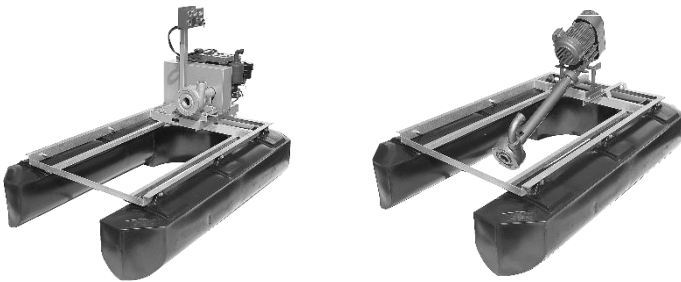

- BIG ON PERFORMANCE BUT EASY TO HANDLE AND INSTALL
- 2.5 METRES LONG 1.5 METRES WIDE BUT WEIGHS ONLY 60 KG
- COMPLETE WITH GALVANISED FRAME WEIGHS APPROX. 110 KG
- LOW PROFILE DESIGN ENSURES MAXIMUM STABILITY

A REEVE FLOATING PUMP SYSTEM. PUMPING AND DE-SLUDGING FROM ANY WATER LEVEL.

A Reeve Effluent Pump mounted onto the floating pontoon provides an ideal method of de-sludging and pumping from effluent treatment or holding ponds. The Heavy Duty pontoon is easily tethered by up to 4 lines to allow simple positioning anywhere on the pond surface. Your Reeve Liquid Effluent pump can be configured to be dual purpose for both stirring/scouring the sludge build-up on the bottom of the pond as well as pumping the "free fertiliser" out onto your crops or pasture via either a Reeve Travelling Irrigator or a Manurain Sprinkler.

THE REEVE FLOATING PONTOON IS TRULY MULTI-PURPOSE

The Reeve pontoon can act as a handy landing platform or stable mounting arrangement for any number of aquatic requirements. If "decked" can be an ideal swimming platform. There are six solid mounting lugs moulded into the pontoon which allows for 5/8" mounting bolts to securely attach any individually built mounting frame or platform. For larger applications, multiple pontoons can be joined together to float heavy loads.
